

Making Memories Session 3 – Contamination and Recycling

We spent the session thinking about what we could recycle as a group and what might contaminate our recycling and we should dispose of elsewhere. Thinking about the recycling we have done so far, we used writing skills to apply for a blue peter badge for our child and supported our child to make a piece of artwork to send in to Blue Peter for a Green Recycling badge. We explained to our child the importance of recycling to reduce contamination and recycled our old missing odd sock and some lavender from Ben's garden to make lavender socks to go under our pillows!
